Luther Dispute Resolution Lecture: Soft Law in International Commercial Arbitration

18 March 2024 | 18:00-20:00 | Bucerius Law School | hybrid

Rules and guidelines in the field of arbitration have been proliferating for years – some of these “soft laws” are widely recognized and even treated as “hard laws”, while others lack legitimacy. **Prof. Dr. Felix Dasser** will examine this phenomenon from all sides. Do we really need a 30-page set of rules that incorporates all current soft procedural law? Or should we simply use soft law as a useful stone quarry depending on the needs of the specific case? How do we determine what may qualifies as soft law? Or is soft law just a fata morgana anyway?

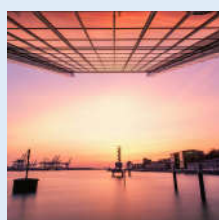

Organiser:

DIS German Arbitration Institute

DIS@HIAD: Efficiency in the Digital Age

19 March 2024 | 09:00-10:30 | Taylor Wessing | in person

The event will focus on "Efficiency in the Digital Age" from an arbitral institution's point of view, providing insights into the daily challenges of managing cases at the "edge of digitalization". The DIS will share its experience, inter alia, with its recently launched DIS eFile platform. The event will be accompanied by a delicious breakfast. The event will be accompanied by a delicious breakfast.

Organiser:

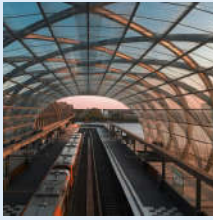

Workshop: Third Party Funding for Commercial Arbitration in Latin-America

19 March 2024 | 09:00-10:30 | Luther | in person

Maximilian Reichl (Oppenhoff) and Malte Stübinger (Deminor) will present a case study to spotlight peculiarities of funding and initiating an International Commercial Arbitration in Latin-America. They want to invite the audience to develop together some best practices on seeking Third Party Funding for Commercial Arbitration in Latin-America and efficiently navigating the case, with Lead Counsel, Client, Local Counsel, and Third Party Funder on board.

Using AI to Handle Big Data in Complex Arbitrations: Practical Solutions & Legal Challenges

19 March 2024 | 10:30-12:30 | Luther | in person

The wealth of information to analyse prior to and throughout complex arbitrations is steadily growing and is increasingly difficult to handle. Reuben Miller (TransPerfect Legal) and Tim Rauschnig (Luther) will therefore explore new approaches to efficiently comb through vast amounts of materials using AI and other advanced technologies and discuss legal prerequisites to apply such technologies and how to implement them (e.g. in Procedural Order No. 1).

Organisers:

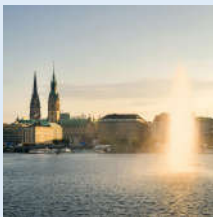

Bucerius HIAD Conference: The Use of AI in Arbitration

19 March 2024 | 13:00-18:00 | Bucerius Law School | in person

Present applications and future perspective

The use of artificial intelligence in all areas of life is constantly advancing. There are also potential applications in the area of dispute resolution – from e-discovery and document review to selecting arbitrators or even predictive analytics.
